Gudie to pour over coffee

1.Weiging Coffee beans
Weiging suitable amount of coffee beans according to your need.

2.Warm coffee cup
Put the filter paper in the filter cup, pour hot water evenly on the paper to make it wet and attach to the filter cup tightly, then pour out the water in the cup,click the key of Zero.

3.Add coffee grounds
Put coffee grounds into filter cup, Click "Coffee grounds", App will tell you the weight, click "Zero".

4. Steaming
Pour water evenly onto coffee grounds, water amount is around 15 times of coffee grounds weight. Steaming time is not fixed. Fresh coffee grounds absorb water and swell,when all the coffee grounds all swelled, the steaming finished, and...

5.Extraction
Pour water from center to outer in circle path, pay attention not to flush to the filter paper, repeat that again from outer to center, keep water steam even, and pour water in 2-3 times. The proportion of coffee grounds and water will shown on APP, 1:13 - 20 is suggested.

6.Complete
Extraction finished, remove the filter cup and enjoy the coffee.

The whole process is completed within 2--3min, the temperature of water is controlled at 85-90 degrees Celsius.
